CTU Open Contest 2008

International Collegiate Programming Contest

`contest.c`, `contest.C`, `contest.java`, `contest.p`

Do you have any idea how much work must be done to make a competition like this to happen? Reserve rooms, install computers, buy some food, print certificates — these are only some of the important tasks. Can you imagine how many sleepless nights have been spent since the first CTU competition in 1995? And this was only for people like you to enjoy the ICPC. Wow!

Beside others, the problem set must be carefully prepared. This includes not only the problem statements but also solutions and test data. It is really a large amount of work. Would you help us, please? Your task is to create a test input data for the Problem B (`banking`).

Input Specification

The input to your program will be some valid and correct output for Problem B.

Output Specification

Print any input that will exactly satisfy the Input Specification for the Problem B and that would generate the given output.

Sample Input	Output for Sample Input
withdraw 20.00: ok	3
deposit 35.00: ok	1234/5 100.00
withdraw 200.00: insufficient funds	4321/6 150.20
transfer 100.50: ok	5432/5 1600.00
transfer 50.00: interbank	withdraw 1234/5 20.00
create: already exists	deposit 1234/5 35.00
create: ok	withdraw 1234/5 200.00
transfer 100.00: same account	transfer 5432/5 1234/5 100.50
transfer 100.00: insufficient funds	transfer 5432/5 4321/6 50.00
withdraw 100.00: no such account	create 1234/5
deposit 0.11: no such account	create 1236/5
transfer 10000.00: no such account	transfer 1236/5 1236/5 100.00
end	transfer 1236/5 1234/5 100.00
	withdraw 0000/0 100.00
deposit 6.92: ok	deposit 0000/0 0.11
withdraw 9.68: ok	transfer 1234/5 0000/0 10000.00
withdraw 6.64: ok	end
end	
	1
goodbye	9999/9 9.40
	deposit 9999/9 6.92
	withdraw 9999/9 9.68
	withdraw 9999/9 6.64
	end
	0

In this problem, "Presentation Error" means that your output format is incorrect and the output does not satisfy the Input Specification for Problem B. "Wrong Answer" will be used if your output seems as a correct input for Problem B but it would not generate the requested answer.
