

## Digits of a number

Find out the digits of a natural number and print them in reverse order.

### Input

From the standard device enter one natural number not exceeding 2,000,000,000.

### Output

You need to output to the standard output device through a space the digits of the number, starting with minimum discharge of a number. Do not put a space at the end of the line.

Sample Input	Sample Output
123456789	9 8 7 6 5 4 3 2 1
20393304	4 0 3 3 9 3 0 2
