

Greatest common divisor

Find the greatest common divisor of two numbers.

Input

From a standard input device two non-negative integers are entered that do not exceed 10000. It is guaranteed that at least one number will be greater than 0.

Output

You need to output one integer to the standard output device - the largest common divisor of the entered numbers.

Sample Input	Sample Output
60 225	15
0 999	999
